PSYCHOTHERAPY

# THE SPECIFICITY OF TEACHING

## OUR TEACHING ALTERNATES BETWEEN THEORY AND PRACTICE

We promote the importance of our theoretical knowledge. Our teaching, founded on Socrates « Know thyself », combines the study of the history of ideas with the study of the human psyche, in an integrative approach : I integrate theory only when it resonates with my own experience.

The understanding comes through the appropriation and the embodiment of the theory.

## GOALS

### GENERAL OBJECTIVES OF THE COURSE

Training in psychoanalytic psychotherapy (theoretical, experiential and practical)

Knowledge of psychic functioning and psychopathology

Bringing into harmony our own being and relationships between other beings

Integration of acquired knowledge

## WHO ARE WE ?

### THE SCHOOL WHERE YOU REDISCOVER THE SELF

The European School of Applied Philosophy and Applied Psychotherapy was born of the desire to create a new teaching space based on a holistic vision of the individual as a whole and in all its dimensions : physical, psychic, emotional, spiritual and universal.

Our program spans five years of training based on the principles of philosophies and psychoanalysis, from Plato to Jung, Aristotle, Socrates, Spinoza, Freud and Nietzsche, all of whom have had an influence on our knowledge of the human being.
